Information

Basic Info

Description:

Common Interest - Beliefs & Causes
This group is an open forum for all those who question the wisdom of neo-classical economics to advocate, debate, criticise and discuss alternatives.

It is also a place where issues relating to globalisation, global trade and economic development can be discussed. Key issues include debating the merits of globalisation, 'free' trade, sustainable development and free market capitalism in general.

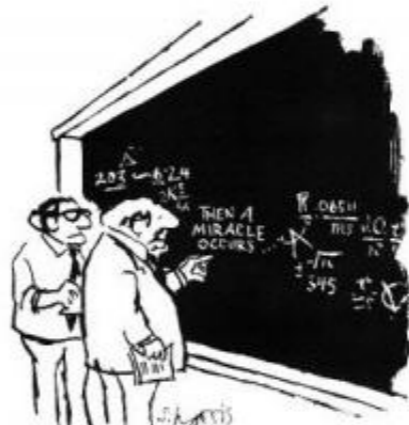

All of the following schools of thought and more belong under the umbrella term heterodox economics:

- Marxian economics
- Post-Keynesian economics
- Feminist economics
- Sraffian economics
- Evolutionary economics
- Complexity theory economics
- Austrian economics
- Participatory economics

All are welcome to join and discuss their opinions, having studied economics isn't a necessary pre-requisite.

Feel free to recommend books, websites and other links...
